### Biographic Data

Birth Date:	August 22 <sup>nd</sup> , 1986
Birth Place:	Sahab, Jordan
Gender:	Male
Nationality:	Jordanian

### Personal Statement

As an assistant professor at the University of Jordan, School of Nursing, I have two main roles; the first is an academic role, and the second is a research role. In the academic role, I teach undergraduate courses at the school of nursing to nursing and non-nursing students with the common interest of community/public health topics. I teach courses like health education and promotion, community health nursing, quantitative research methods, and first aid, among others. In the research role I conducted several research studies since the beginning of my faculty appointment on the following topics: Public health, Community health, Epidemiology, Biostatistics, Global Health, Quality of life research, Quantitative research methods, Clinical prevention and population health, Underserved populations, Youth health, Women's health, and Humanitarian emergencies and refugee health.

I finished Ph.D. program in June, 2016 at the School of Nursing at University of California, San Francisco. The title of my dissertation was "Social Determinants of Health-related Quality of Life in Palestinian Refugees Living Inside and Outside Camps in Jordan". Two relevant research papers were submitted for publication since my doctoral graduation. The first was published online in May, 2017 and was entitled: "Health-related quality of life of Palestinian refugees inside and outside camps in Jordan". The second one is still under review and it is entitled: "Depression, Perceived Health and Right-of-Return Hopefulness of Palestinian Refugees". Furthermore, I plan to continue working with refugees in Jordan and contributing to the understanding of their health and quality of life in the physical, psychological, social, as well as environmental domains over the course of my academic career. Other ongoing research project include funded and non-funded studies that are currently taking place in collaboration with colleagues from the school of nursing's and other schools' faculty members. These include studies of youth health needs, women's health and health awareness, nursing faculty research productivity, as well as men's perspective on non-communicable diseases and lifestyle. Secondary to my academic position, I attended, and spoke in a few international conferences, including a May 2017 international conference of refugees and displaced persons in Ankara, Turkey, among others.

## Education:

### Graduate

1. **Ph.D.:** Doctorate of Philosophy in Nursing. University of California San Francisco (UCSF), USA, 2013-current. G.P.A: 3.87/4
  - Quantitative research track, June 2016.
