Title and abstract of the doctoral thesis (within 150 words)
<p>Exploratory Study of the Registered Nurses' Role in Health Promotion Relating Cardiovascular Disease in Jordan</p> <p>Background: in Jordan, the growing health needs related to high rates of obesity, smoking and sedentary lifestyle has led to a high prevalence of cardiovascular disease (CVD). Registered nurses have an important role in promoting health related to cardiovascular disease. However, there is a lack of evidence on the role of the registered nurses in promoting health of the Jordanian population. This study aims to</p>

explore the role of the registered nurses relating to health promotion and cardiovascular disease in Jordan. **Methods:** a correlational cross-sectional survey was conducted using cluster random sampling at the sector level with proportional quota sampling within individual study sites. A sample (n=1726) of RNs (n=676), doctors (n=458) and patients (n=592) were recruited from community and hospital settings in Amman. Data were collected using structured self-administered questionnaires. **Findings:** the RNs reported positive views regarding their role in health promotion relating to CVD and achieved high knowledge scores related to CVD. The doctors and patients, however, reported negative views regarding the RNs' role. The RNs' perceptions of general health promotion and their role in general health promotion together with personal health behaviours, were associated with their perceived role legitimacy in health promotion relating to CVD. Lack of time and perceived role together with limited health promotion training and communication problems with patients were constraints to the RNs' role. **Conclusion:** the role legitimacy of the RNs in health promotion relating to CVD is limited in Jordan. It is important for professional bodies and healthcare employers to agree the RNs role in health promotion relating to CVD. Further examination of the barriers inhibiting the RNs role legitimacy in health promotion relating to CVD is crucial

Career Experience

Job Title	Place of work	Date
Staff Nurse	Sobell Hospice House, Oxford city, Old Road, Headington Oxford, UK OX3 7LJ	06 July 2009 - 03 September 2009
Assistant Professor	Al-Zaytoonah Private University of Jordan	September 2014 - September 2015
Assistant Professor	University of Jordan	September 2015- until now

Administrative works and committees
