

Personal Information

Name	Mamdouh El-hneiti, Asociarte Professor
Place and date of birth	9 th November 1986; Amman, Jordan
Faculty	School of Nursing
Department	Community Nursing Department
Email	m.elhneiti@ju.edu.jo
Phone Number	00962790448048

Qualifications

Qualification	Specialization	University of donor rank	Date
BSc	Nursing	University of Jordan	June 2008
MSc	Cancer Care	Oxford Brookes University, UK	September 2009
PhD	Nursing Studies	King's College London, UK	August 2014

Specialization and domain of interest

Specialization	Community Health/ Public Health Nursing
Domain of interest	Community nursing care, older adults care, COVID-19, Quality of Care, Public Health, Health promotion

Specialization and domain of interest

Title and abstract of the doctoral thesis (within 150 words)

An Exploratory Study of the Registered Nurses' Role in Health Promotion Relating to Cardiovascular Disease in Jordan

Background: in Jordan, the growing health needs related to high rates of obesity, smoking and sedentary lifestyle has led to a high prevalence of cardiovascular disease (CVD). Registered nurses have an important role in promoting health related to cardiovascular disease. However, there is a lack of evidence on the role of the registered nurses in promoting health of the Jordanian population. This study aims to explore the role of the registered nurses relating to health promotion and cardiovascular disease in Jordan. **Methods:** a correlational cross-sectional survey was conducted using cluster random sampling at the sector level with proportional quota sampling within individual study sites. A sample (n=1726) of RNs (n=676), doctors (n=458) and patients (n=592) were recruited from community and hospital settings in Amman. Data were collected using structured self-administered questionnaires. **Findings:** the RNs reported positive views regarding their role in health promotion relating to CVD and achieved high knowledge scores related to CVD. The doctors and patients, however, reported negative views regarding the RNs' role. The RNs' perceptions of general health promotion and their role in general health promotion together with personal health behaviours, were associated with their perceived role legitimacy in health promotion relating to CVD. Lack of time and perceived role together with limited health promotion training and communication problems with patients were constraints to the RNs' role. **Conclusion:** the role legitimacy of the RNs in health promotion relating to CVD is limited in Jordan. It is important for professional bodies and healthcare employers to agree the RNs role in health promotion relating to CVD. Further examination of the barriers inhibiting the RNs role legitimacy in health promotion relating to CVD is crucial

Career Experience

Job Title	Place of work	Date
Registered Nurses	Kaplan Hospice for palliative care, Oxford United Kingdom	Sep 2008- Sep 2009
Assistant Professor	Al-Zaytoonah Private University of Jordan	September 2014 - September 2015

Assistant Professor	School of Nursing- University of Jordan	September 2015- October 2019
