Specialization and domain of interest

Specialization	Community Health Nursing
Domain of interest	Health promotion and illness prevention, school health, adolescents, youth, and women health, COVID research

Career Experience

Job Title	Place of work	Date
Assistant Professor	The University of Jordan	November 2017 until now
Teaching Assistant	University of California, San Francisco	September 2015- September 2017
Statistics and Comprehensive exam tutor	University of California, San Francisco	September 2015- September 2017

Teaching assistant	The University of Jordan	August 2011-August 2012
Registered nurse and health educator	The Ministry of Health	August 2009-July 2011
CCU Registered nurse	The Royal Medical Services Queen Alia Heart Institute	June 2007- September 2008

Specialization and domain of interest

Title and abstract of the doctoral thesis

self-rated health and serious psychological distress of Arab immigrants in the United States

This dissertation included 3 published research papers in high ranked international ISI journals this research investigated two important physical and mental health aspects of Arab immigrants' life in the United States (US) including self-rated health (SRH) and serious psychological distress (SPD). In the systematic review of SRH for Arab and Middle Eastern immigrants, the rates of fair/poor SRH and the associated factors with the risk of reporting fair/poor SRH in this population were examined. The rates of fair/poor SRH among Arab and Middle Eastern immigrants ranged widely from 4.7% to 41%. This variability was probably related to the variations in sample characteristics in the studies; four of these studies were conducted in different local communities in the US that vary in their socioeconomic characteristics. In the two national studies on SRH of Middle Eastern immigrants, rates of fair/poor SRH were approximately 13% (Read et al, 2005; Read & Reynolds, 2012), which most likely reflected an actual rate of fair/poor SRH in Arab and Middle Eastern immigrants.

In the study of SPD among Middle Eastern immigrants in the US, the

prevalence of SPD in a nationally representative sample of first-generation Middle Eastern immigrants in the US was examined using NHIS data between 2001 and 2015. This dissertation study found that the rate was the highest in this population (5.99%) between 2006 and 2010, while the lowest was between 2011 and 2015. Middle Eastern immigrants also reported significantly higher SPD risk, compared to US-born non-Hispanic Whites in 2001-2015 combined. Being female, having obesity, and contacting a mental health professional in the past year were factors associated with higher risk of SPD in this population. This study indicated that first generation Middle Eastern immigrants, particularly, showed to some extent specific healthcare needs; women, individuals with high BMI, and those with existing mental health issues have the highest need for effective mental health services.

In the SRH study, we examined the trends of SRH rates in a nationally representative sample of first-generation Middle Eastern immigrants and US-born non-Hispanic Whites between 2001 and 2015. We also examined the influence of associated factors with fair/poor SRH among the Middle Eastern group. The highest rates of fair/poor SRH in both groups were in 2011 to 2015, and Middle Eastern immigrants had 1.24 higher risk of reporting fair/poor SRH than US-born Whites for the 15 years combined. Among the Middle Eastern group, having SPD, being age 60 years or older, being a current alcohol drinker, and having a family member with disability were associated with significantly higher risk of fair/poor SRH, while education was a significant protector against the risk of low SRH. Similar to the results of the study of SPD, acculturation measured by years lived in the US and citizenship did not significantly influence the risk of having low SRH. This also indicates specific healthcare needs among this immigrant population, as well as, healthcare policies that address mental health issues, and family centered-healthcare.
