Cleveland Clinic

Cleveland, OH

### Project Manager

- Responsible for all aspects of project development and management of the Performance Based Development System (PBDS) and acts as the single point of contact for the project. Provides analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems related to project implementation.
- Directs PBDS project from original concept through completion. Develops detailed work plans, schedules, project estimates, resource plans and status reports. Conducts project meetings and is responsible for project tracking and analysis.
- Ensures adherence to quality standards and reviews project deliverables. Manages the integration of vendor tasks and tracks and reviews vendor deliverables.
- Reviews and maintains visibility of financial components of assigned projects ensuring adherence to established targets.
- Responsible for managing the overall project deliverables.
- Prepares reports/presentations and presents as necessary to the key stakeholder groups.
- Acts as enterprise-wide liaison regarding all aspects of PBDS ensuring ongoing communication between/with community hospitals and main campus.
- Minimizes exposure and risks on projects.

- Establishes and maintains an efficient/secure process for distribution/communication of assessment data and related action plans.
- Participates in quality monitoring of PBDS and associated program outcomes and utilizes data to plan; evaluates and improves processes related to project.
- Remains on the forefront of emerging industry best practices and new technologies, including but not limited to those related to project management, process improvement and leadership development.

---

Nov 05, 2008 - May 14, 2010

Cleveland Clinic

Cleveland, OH

### **Faculty Advanced Clinical Nurse**

- Instruct nursing students in the theoretical and clinical aspects of the professional practice of nursing. In consultation with the Education Administrator, develop curriculum content, course descriptions and teaching schedules.
- Interact in collegial fashion and collaborate with nursing personnel to coordinate educational experiences in the clinical area. Make appropriate patient assignments based on student's abilities and course objectives. Assist students through observational and participative experiences to apply nursing theory, nursing process and nursing techniques in the clinical setting.
- Counsel students on educational and related problems. Make recommendations to the Education Administrator in developing curriculum content and improve teaching and assessment techniques. Discuss instructional methodologies and related matters with the Education Administrator and strive to continuously improve the quality of student nursing instruction.
- Attend professional workshops, seminars and other educational meetings to promote growth and broaden the knowledge base and skills of the faculty.

---

April 7, 2008 – October 30, 2008

Cleveland Clinic

Cleveland, OH
